HTML5 ●●●●●
React ●●●●●

CSS3 ●●●●●
Vue ●●●●●

TypeScript ●●●●●
Node.js ●●●●●

- JavaScript
- React Native
- Svelte
- Tailwind
- Jest
- SQL

WORK EXPERIENCE

Extra Card

Senior Full Stack Engineer

Jan 2022 - Jun 2024

- Led development on the web signup funnel, built with Vue/Nuxt, Sass, and Tailwind CSS. Increased Lighthouse performance score by over 20 points. Ran A/B tests using Growthbook. Managed analytics and tracking through GTM, Segment, and Rudderstack.
- Designed and implemented MySQL database schemas, REST API endpoints, controllers, and web and app UI key to the Extra Match feature, the company's highest priority in Q2 2024.
- Made major contributions to the backend API, built with Node.js, Express, and TypeScript. Built secure integrations with third-party APIs, and wrote unit tests using Jest.
- Contributed to an internal dashboard for technical support engineers built with React/Next.js, as well as the React Native mobile app.
- Monitored production deployments with Datadog and Sentry. Reviewed pull requests and managed deployments using Git and GitHub Actions.

Mood Media

Senior Web Developer

Jun 2016 - Jan 2022

- Developed over 1000 pieces of responsive digital signage with vanilla HTML, CSS, and JavaScript. Optimized for low-powered devices and unstable network conditions.
- Built touch-based web applications in Vue for clients including Dyson, Ferrari, and Bridgestone. Worked with clients directly to determine timelines and scope.

Charles Schwab

Developer, Retirement Technologies

Aug 2015 - Jun 2016

- Helped launch Schwab's consumer-facing retirement plan dashboard, built with Angular and TypeScript. Followed agile development practices.
- Designed and implemented an automated email service, including SQL scripts and stored procedures, and back-end code in C# using ASP.NET.

EDUCATION

The University of North Carolina at Charlotte

Bachelor of Science, Computer Science - 3.68g GPA

May 2015
